NISHAL KUMAR M

MECHANICAL ENGINEERING AT ANNA UNIVERSITY

Ph : +91 9345678887 | nishalkumar.work@gmail.com | www.linkedin.com/in/nishalkumarm

SUMMARY

Mechanical Engineering student at CEG, Anna University, with hands-on internship experience at TVS. Skilled in SolidWorks, MS Office, and basic automation, with a strong interest in design and manufacturing. Currently learning German (B2 goal) to pursue international opportunities, especially in Europe. Highly disciplined, growth-oriented, and driven by a vision to succeed globally while supporting family aspirations.

TECHNICAL SKILLS

MS Suite
Python (Basics)
Adobe Illustrator
Solidworks
CREO Parametric
Siemens NX CAD
Adobe Premiere Pro
DaVinci Resolve
Adobe Photoshop

PROFESSIONAL EXPERIENCE

TVS OM Sakthi Motors - Intern **June 2025**

- Gained hands-on experience in vehicle service and maintenance processes at the TVS showroom and workshop in Vathirairuppu, focusing on customer service and workshop management.
- Assisted technicians in diagnosing and repairing two-wheelers, learning real-world applications of mechanical systems and automotive components.
- Observed service workflow, inventory handling, and spare parts management, enhancing understanding of dealership operations and customer satisfaction strategies

EDUCATION

Bachelor of Engineering in Mechanical Engineering **Aug 2023 - Present**

College of Engineering ,Guindy - Anna University, Chennai

- Pursuing core subjects including Fluid Mechanics, Thermal Engineering, Machine Design, and Product Development, building a solid foundation in mechanical systems.
- Actively involved in hands-on projects, internships, and skill development to align academic learning with industry requirements.

HSC - State Board

Nava Bharath Matric Higher Secondary School **June 2021 - Apr 2023**

- Scored 535/600 (89.1%) in 12th grade, with strong performance in Mathematics and Physics.
- Developed analytical and problem-solving skills through higher secondary coursework.

MINI PROJECTS

Color-Based 6-Axis Robotic Gripper System

- Built an Arduino-controlled robotic arm with automatic end-effector switching based on color detection.
- Used TCS3200 color sensor and 5V relay to control suction and clamp grippers.
- Applied in automation for sorting fragile items in food and warehouse domains.

Low Cost Tire Pressure Monitoring System

- Developed a budget-friendly TPMS using Arduino and pressure sensors to monitor and alert pressure anomalies.
- Designed for application in two-wheelers and entry-level cars to improve safety and fuel efficiency.
- Focused on affordability and ease of integration for small vehicle manufacturers.

ADDITIONAL INFORMATION

- **Languages:** English, German, Tamil
- **Certifications:**
  NPTEL - Business Analytics & Data Mining Modeling using R
  Coursera - SolidWorks Essentials
